

## How to: Register an account

You only need to register if you are organising/coordinating a group yourself.

Once a group administrator adds someone's number to the group account that person can receive and reply to ActivistSMS messages without having to register themselves.

You will not need the code again.

This is the only text that is sent to your phone.

**If someone replies to a text you send from ActivistSMS the reply goes to your account on the website, not your phone.**
